Anaconda_Install_Instructions_Windows

January 7, 2016

Install Anaconda on Windows
Youtube tutorial available at: https://www.youtube.com/watch?v=KH2yIk03jFc
pretty ipython notebook (nicely formated webpage): https://github.com/mGalarnyk/Anaconda_Install_Mac_Ubuntu_Win
(if link fails try: github.com/mGalarnyk)
Install Gnu on Windows

1) Download and install Gnu on Windows (Gow) from
   https://github.com/bmatzelle/gow/releases/download/v0.8.0/Gow-0.8.0.exe

Install Anaconda and iPython Notebook

1) Download and install Anaconda from
   http://repo.continuum.io/archive/Anaconda-2.3.0-Windows-x86_64.exe
   Select the default options when prompted during the installation of Anaconda

   2) Restart your computer (to allow for updating)

3) Open Anaconda Command Prompt

   4) Type the command in red to check Anaconda version
      python –version
      Start IPython Notebook

      1) Type the command in red to start iPython Notebook
         ipython notebook

Congrats! You are Done!
